

Corrosion Service was founded in 1950 by Thomas R.B. Watson as the first Canadian firm to specialize in cathodic protection. Our founding philosophy was based on the principles of providing great customer service and developing a deep understanding of customer needs, these same core principles still guide our company today.

Throughout our history we have always been privately owned by successive groups of employees that have risen through the organization. This ownership structure gives us a unique perspective on business and ensures that our stakeholders (customers, employees and partners), rather than shareholders, always come first. This is vital for a company such as ours, given that we exist primarily to protect the environment, our citizens and the prosperity of the communities in which we live. The position is based in Markham, Ontario.

Position: Software Developer

Duration: 12 Months

GENERAL FUNCTION:

Use modern web development techniques to create, deploy, and maintain the UI/UX for custom business applications. We are currently looking for front-end Software Developers to join our team! Reporting to the Business Analyst.

RESPONSIBILITIES:

- Create custom SharePoint Add-ins (front-end web dev)
- Work with a small team on a company-wide SharePoint Online implementation.
- Create LoB applications to support Engineering teams.
- The developer is responsible for working with internal partners to develop all aspects of the software development life cycle (requirements, design, implementation, testing, deployment, and maintenance).
- Work to develop and maintain custom tools across various business groups. Develop full technical design, programming and deployment work in a team environment.
- Create processes related to data governance and security across the business. Assist with product development sessions with creative designers and other stakeholders as part of the requirements and design phases.

QUALIFICATIONS:

- The successful candidate will have 1-2 years' experience and possess a degree in Computer Science, Software Engineering, Computer Engineering, Computational Math, Advance Diploma or equivalent.
- Highly proficient front-end web development skills (CSS, HTML, JavaScript, jQuery + Angular/React (or equivalent))
- Highly proficient Microsoft Office skills (Excel, Word, Access, SharePoint, general O365)
- Proficient relational database skills (Access, SQL server)
- Proficient scripting skills (PowerShell, Python, etc.)
- Experience with C#, Visual Studio, and .NET framework
- Experience with SharePoint administration/development

- Experience with Power BI, Power Query, Power Pivot, DAX
- Experience with application development (application layering, deployment, testing)

- Excellent communication skills, both verbal and written
- Detail-oriented with the ability to produce high quality software within given timelines
- A hunger to learn and ability to flourish in a fast-paced, high-growth, entrepreneurial environment
- Entrepreneurial, self-starter with hands-on approach
- Comfortable working independently and with minimal supervision

We are an organization where you can apply your skills to some of the world's most challenging, and interesting projects nationwide. It is a place that values the diversity of our areas of practice and our people. It's what makes Corrosion Service a great place to work and grow. Corrosion Service is an Equal Opportunity Employer.
