

Corrosion Service was founded in 1950 by Thomas R.B. Watson as the first Canadian firm to specialize in cathodic protection. Our founding philosophy was based on the principles of providing great customer service and developing a deep understanding of customer needs, these same core principles still guide our company today.

Throughout our history we have always been privately owned by successive groups of employees that have risen through the organization. This ownership structure gives us a unique perspective on business and ensures that our stakeholders (customers, employees and partners), rather than shareholders, always come first. This is vital for a company such as ours, given that we exist primarily to protect the environment, our fellow citizens and the prosperity of the communities in which we live.

Position: Internal Corrosion Technician

Responsibilities:

- Responsible for completing tasks related to the installation and maintenance of internal corrosion devices including coupons and electrical probes
- Responsible for retrieval and installation of high-pressure and low-pressure coupons and probes as required
- Perform integrity assessments including internal corrosion direct assessment
- Responsible for the maintenance and operational function of assigned vehicle, tools and equipment.
- Responsible to coordinate and complete the specific project task objectives.
- Responsible for the infield training and development of other junior Project Team members.
- Responsible for the profitable delivery of Corrosion Services products and services in the field.
- Respond promptly to Customer/Project issues in co-operation with the Junior/Senior Team Leaders and project staff.
- Provide on-site technical advice to team personnel as required. Provide Junior/Senior Team Leaders information regarding technical problems to allow a remedial plan to be determined in a cost-effective manner.
- Advise design engineers and project managers of special facility design considerations
- Follow Corrosion Service's and client operations and HSE procedures and policies.
- Ensure that all required reporting is submitted to the Team Leaders/Safety Representative including, but not limited to, operational reporting (ie. Health & Safety Inspections Forms, Observational Based Safety Forms, Near Misses, Incidents, etc.).
- Complete timesheets and expenses in a timely manner to keep project costs current.
- Follow inventory removal/addition procedures to ensure accurate counts.
- Develop the culture of employee's attitudes towards work and each other. Code of Conduct etc.
- This position is 90% of work in the field.

**Qualifications:**

- Minimum 2 years of experience working with internal corrosion is required
- Cathodic Protection and AC Mitigation experience is an asset.
- Completion of university or college from an electrical/electronic engineering or technology program is an asset.
- Individuals should have NACE Certification.
- Previous experience in supervisory/leadership and/or project management role would be considered asset.
- Must be physically fit, willing to routinely work outdoors and able to lift 20 Kg on a regular basis.
- The candidate should have solid hands-on technical capabilities, valid driver's license, be willing to travel and work overtime.
