

Corrosion Service was founded in 1950 by Thomas R.B. Watson as the first Canadian firm to specialize in cathodic protection. Our founding philosophy was based on the principles of providing great customer service and developing a deep understanding of customer needs, these same core principles still guide our company today.

Throughout our history we have always been privately owned by successive groups of employees that have risen through the organization. This ownership structure gives us a unique perspective on business and ensures that our stakeholders (customers, employees and partners), rather than shareholders, always come first. This is vital for a company such as ours, given that we exist primarily to protect the environment, our citizens and the prosperity of the communities in which we live. The position is based in Markham, Ontario.

Position: Corrosion Technician

Duration: Contract

GENERAL FUNCTION:

RESPONSIBILITIES:

- The candidate shall report to the Junior Team Lead of TEO.
- Examples of field activities:
 - Annual cathodic protection surveys (pipelines, refineries, plants, etc) – 60%
 - Indirect Inspection Surveys – 5%
 - Impressed current anode refurbishment installations – 20%
 - Cathodic protection design of new systems – 5%
 - Rectifier troubleshooting and repairs – 10%
- Field assignments must be completed in an efficient and timely manner.
- Data analysis and technical report writing must follow immediately after field activities back in the office.
- Data must be downloaded and sent back to the office on a daily basis when in the field.
- Field timelines and schedules are determined by the Project Coordinator / Team Leads. Project progress and 'on-the-fly' field scheduling will be determined by the field lead.
- This role is a key critical component to the overall technical team at CSCL. He/she serves as the CSCL representative 'on-the-floor', interfacing with clients, and further building on an already existing good reputation for technical competency.

QUALIFICATIONS:

- Applicants should be university or college graduates from an electrical/electronics engineering or technology program.
- Prior work experience in a field support type role would be an asset.
- Individuals with NACE CP Certification would be preferred.
- Candidates must have good oral, written communication, and computer skills.
- Must be physically fit, willing to routinely work outdoors, and able to lift 30kg on a regular basis.
- The candidate should have solid hands-on technical capabilities, valid driver's license, be willing to travel, and work overtime.
- General understanding of electrical circuits and theory.
- Good initiative, adaptable, flexible, and team player.
- Technical (electrical) background, good problem solving skills.
- Good physical shape, outdoorsy type, ability to swim, not afraid of bugs, enjoys hiking, hard worker, not a complainer.
- Any cathodic protection background will be an asset.
