

Corrosion Service was founded in 1950 by Thomas R.B. Watson as the first Canadian firm to specialize in cathodic protection. Our founding philosophy was based on the principles of providing great customer service and developing a deep understanding of customer needs, these same core principles still guide our company today.

Throughout our history we have always been privately owned by successive groups of employees that have risen through the organization. This ownership structure gives us a unique perspective on business and ensures that our stakeholders (customers, employees and partners), rather than shareholders, always come first. This is vital for a company such as ours, given that we exist primarily to protect the environment, our citizens and the prosperity of the communities in which we live.

Position: Construction Supervisor

Duration: Contract

GENERAL FUNCTION:

The successful candidate will be part of the Operations Group. This position is based out of Regina Saskatchewan, Brandon Manitoba, and Winkler Manitoba.

RESPONSIBILITIES:

- Supervision of construction projects and by effectively coordinating with field staff, subcontractors and oil and gas clients to manage deliverables and day to day construction operations.
- Extensive travel requirements with nearly all work occurring in a field setting away from the home office bases.
- Days on/off schedules will vary dependent on project/client scope and directive. Work can be expected to be between 6-12 hours daily.
- Coordinate and hold project start-up and orientation meetings.
- Communicate and meet with management, field staff and customer representatives and assist with determination of project requirements, problems and solutions in a positive and constructive manner.
- Manage projects to ensure the project is constructed in accordance with design, budget, and schedule.
- Ensure all related operations are conducted in a safe and responsible manner and that duties are carried out as per O.H. & S. Regulations, the Safety Management Guide, and any additional project requirements.
- Interface with company and client management to ensure that project support functions operate within company standard practice and procedures and contract provisions.
- Manage issues as they arise.

QUALIFICATIONS:

- High school diploma.
- 5 plus years experience in construction as a lead or as a supervisor.
- Experience within oil & gas industry would be considered an asset.
- Experience within industrial electrical work would be considered an asset.
